

WIN-PAK® 4.7 for Access and Integration

Access Control and Integrated Security Software Solution

Honeywell's WIN-PAK 4.7 software solution provides a cost-effective way to integrate and manage access control, video surveillance, and intrusion detection through a single interface.

Building upon WIN-PAK's legendary and robust workstation-based management system, WINPAK 4.7 provides an intuitive browser-based interface allowing users to perform common access control actions from virtually anywhere.

WIN-PAK 4.7 can be easily scaled from a single site up to a multi-region, enterprise-level solution without placing restrictions on the number of users or sites being managed. WIN-PAK 4.7 supports third party integrations such as HID's Mobile Access®, BioConnect® Suprema® and Morpho biometrics, point-of-sale systems, visitor management, and HR applications. Using WIN-PAK's API your software developers can create custom integrations to meet your integration needs.
