# Introduction

Thank you for purchasing the GANZ DIGIMASTER.

This DVR is produced using the most advanced CBC technology and its quality is guaranteed by strict reliability and compatibility testing.

This manual provides necessary information for the correct use of this product and also contains some useful tips.

Please read this manual thoroughly before using your DVR in order to prevent possible malfunctions due to any mishandling.

## Notice

This manual applies to the DR4HL.

This manual describes the external features of GANZ DIGIMASTER, part names, correct connection methods for supported domes or pan/tilt receivers, control devices, peripheral devices and the system setup instructions. It is important to note here that some features, figures, pictures and references can only be applied to just one model.

- CBC cannot be held responsible if the DVR is damaged due to the use of non-compatible devices with this product. If you have any doubts, please check.
- CBC cannot be held responsible if the DVR is damaged due to the product being disassembled or modified by the user.
- This product is qualified for both domestic and industrial use. This product is qualified under the Radio Equipment Requirements of Korea and acquired international certification including CE (Europe) and FCC (USA).

**This manual is written based on the 4 Channel DVR. The contents may change according to the number of Channels and the type of exterior equipment.**

# Copyrights

All copyrights of this manual are reserved by CBC Co., Ltd.

Copyright© 2010

Any reproduction or republishing of this manual for commercial purposes is prohibited.

It is prohibited to transfer this manual via online media such as, but not limited to, the Internet.

It is also prohibited to post, distribute or translate this manual without permission from CBC.

CBC is not held responsible if the DVR is damaged as a result of improper handling by a user unaware of how to operate this product or who did not consult this manual before attempting to operate the product.

CBC reserves the right to change the contents of this manual without notice.

CBC reserves all copyrights of registered trademarks in this manual.

# Caution

Please be aware of the following precautions before installing the DVR.

Avoid positioning the GANZ DIGIMASTER in any place where the unit may come into contact with moisture, dust, or soot.

- Avoid placing in direct sunlight or near heating appliances.
- Keep the product away from electric shock or magnetic substances.
- Avoid temperature extremes (recommended operation temperature is between 0°C and ~40°C).
- Do not place any conductive material through the ventilation grills.
- Keep the system turned off before installation.
- Ensure that enough space is left for cable connections.
- Place the system on a solid surface with sufficient air ventilation. Avoid any surface that vibrates.
- Placing the system near electronic devices such as radio or TV may cause the product to malfunction.
- Do not disassemble the product without seeking assistance from the supplier.
- Do not place any heavy object on the system.
- Please keep cleaning the fan filter of front panel.

## **CALIFORNIA USA ONLY**

This Perchlorate warning applies only to primary CR (Manganese Dioxide) Lithium coin cells in the product sold or distributed ONLY in California USA.

"Perchlorate Material – special handling may apply. See [www.dtsc.ca.gov/hazardouswaste/perchlorate](http://www.dtsc.ca.gov/hazardouswaste/perchlorate)."

## **Safety Warnings and Cautions**

The following are warnings and cautions to ensure user safety and prevent property damage. Please read the information below thoroughly.

## Warning and caution signs

 **Warning** If you are not aware of this warning, you may be seriously injured or be killed

 **Caution** If you are not aware of this caution, you may be injured or cause property loss.

## Warning

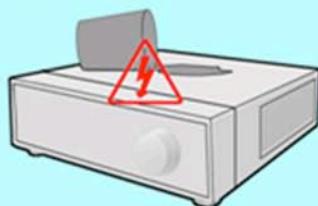

Turn off the system before installing the system. Do not plug in several electric devices to the same outlet.

- This may cause heating, fire or electric shock.

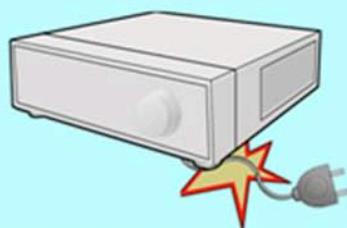

Do not place any liquid container on the system, such as water, coffee or any other beverage.

- If liquid is poured onto the system, it can cause a system malfunction or fire.

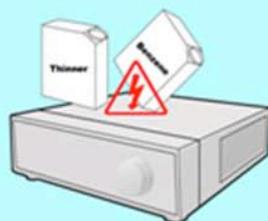

Prevent the power cable from being severely bent or pressed by a heavy object.

- This may cause fire.

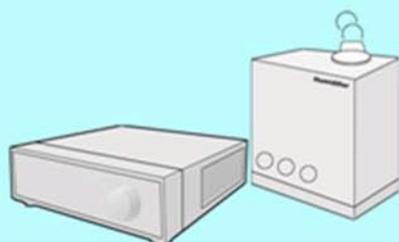

Clean the dust around the system on a regular basis. When cleaning the system, always use dry cloth. Do not use wet cloth or other organic solvents.

- This may damage the surface of the system and can cause system malfunction or electric shock.

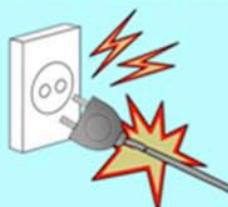

Avoid any place with moisture, dust, or soot.

- This can cause fire or electric shock.

When pulling the power cable from the plug, do so gently. Do not touch the plug with wet hands and avoid using the plug if the holes on the outlet are too loose.

- This may cause fire or electric shock.

## Warning

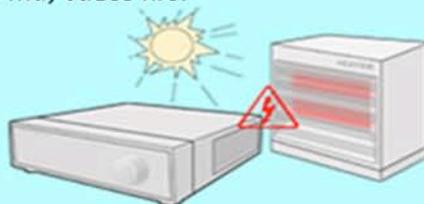

Do not attempt to disassemble, repair or modify the system on your own. It is extremely dangerous due to high voltage running through the system.

- This may cause fire, electric shock or serious injuries.

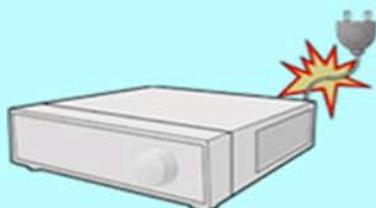

Install the system in a cool place without direct sunlight and always maintain room temperature. Avoid candlelight and heat-generating devices such as a heater. Keep the system away from high-traffic areas.

- This may cause fire.

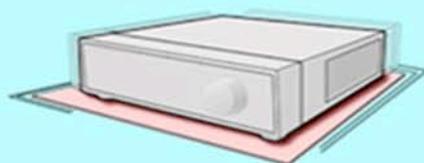

Check for any danger signs such as a moist floor, loosened or damaged power cable or unstable surface. If you encounter any problems, ask your dealer for assistance.

- This may cause fire or electric shock.

Install the system on a flat surface with sufficient air ventilation. Do not place the system on elevated surface.

- This may cause system malfunction or serious injuries.

Keep at least 15cm between the back of the system and the wall for the cables connected into the system. Otherwise, the cables may be bent, damaged or cut.

- This may cause fire, electric shock, or injuries.

The power outlet must be placed on a ground, and the voltage range must be within 10% of the voltage rate. Do not use the same outlet with a hair dryer, iron, refrigerator or any heating appliances.

- This may cause fire, heating and electric shock.

When the system's battery is depleted, you must replace it with the same or equivalent type of battery specified by the manufacturer. Depleted batteries should be discarded according to manufacturer's instructions.

- This may cause an explosion.

If the system's HDD has exceeded its life span, you may not be able to recover any data stored inside the HDD. If the video on the system screen appears 'damaged' while playing a recording stored inside the system's HDD, it must be replaced with a new one. Ask for an engineer's assistance for HDD replacement from your dealer.

- CBC is not responsible for deleted data caused by user mishandling.

## Caution

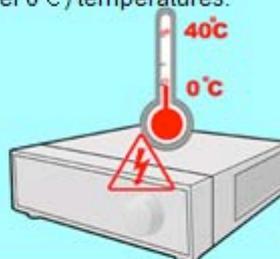

Do not install the system in an area featuring high magnetic, electric wave or wireless devices such as radio or TV.

- Install the system in a place without magnetic objects, electric frequencies or vibration.

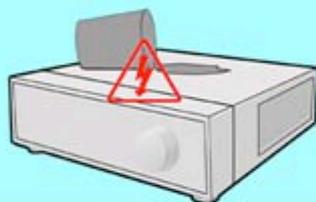

Install the system in a place with appropriate moisture and temperature levels.

- Avoid installing the system at high (over 40°C) or low (under 0°C) temperatures.

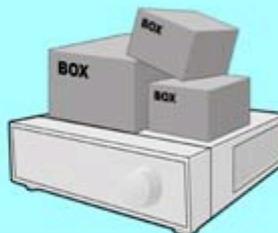

Prevent any substances from entering into the system.

- This may cause system malfunction.

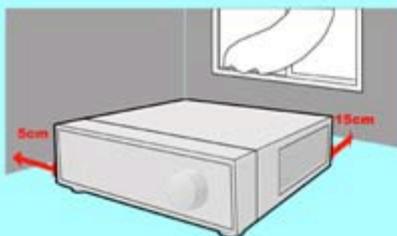

Do not place any heavy objects on the system.

- This may cause system malfunction.

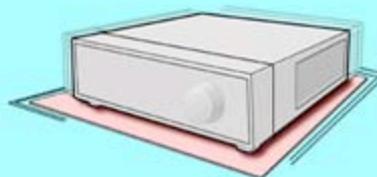

Install the system in a place with sufficient air ventilation.

- Keep at least 15cm distance between the back of the system and the wall, and at least 5cm distance between the side of the system and any walls.

Install the system on a stable and level surface.

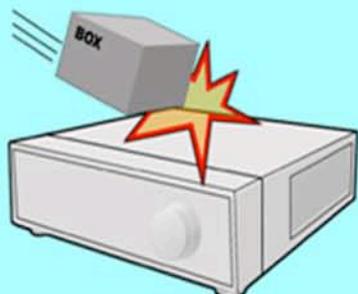

- The system may not operate properly.

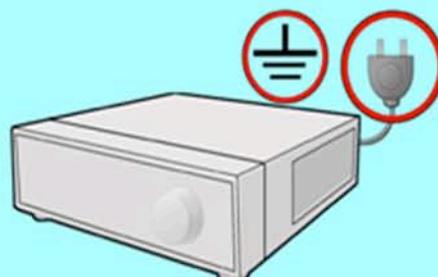

## Caution

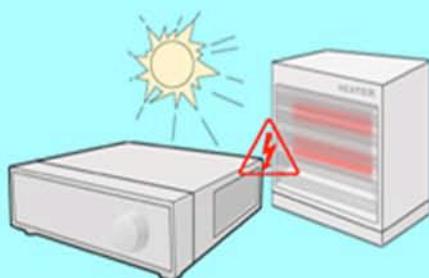

The system can be damaged as a result of strong impact or vibration. Avoid throwing objects within the vicinity of the system.

The outlet must be placed on the ground.

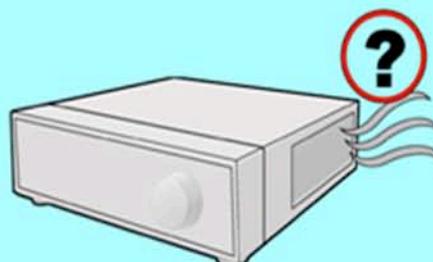

Avoid direct sunlight or any heating appliances.

If there is strange sound or smell, unplug the power cable immediately and contact the service center.

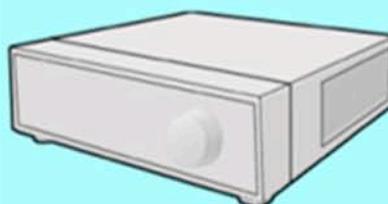

• This may cause fire or electric shock.

Ventilate the air inside the system operation room and tighten the system cover firmly.

• System malfunction may be caused by inappropriate environment.

**Do not overturn the product when in use.**

It is recommended to use AVR (automatic voltage regulator) for stable power supply.

It is recommended to coil the core-ferrite around the connector of the system to avoid electromagnetic interference.

In order to maintain stable system performance, have your system checked regularly by the service center.

• CBC is not held responsible for system breakdown caused by user mishandling.

## ***Important Safety Instructions***

- 1) Read these instructions.
  - 2) Keep these instructions.
  - 3) Read all warnings.
  - 4) Follow all instructions.
  - 5) Do not use this apparatus near water.
  - 6) Clean only with a dry cloth.
  - 7) Do not block any of the ventilation openings. Install in accordance with the manufacturer's instructions.
  - 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus that produce heat.
  - 9) Do not defeat the safety purpose of the polarized or grounding type plug. A polarized plug has two blades with one wider than the other.  
A grounding type plug has two blades and a third grounding prong.  
The wide blade or the third prong is provided for your safety.  
When the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
  - 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
  - 11) Only use the attachments/accessories specified by the manufacturer.
  - 12) Use only with a cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus.  
When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
  - 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
  - 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
  - 15) This equipment is indoor use and all the communication wirings are limited to inside of the building.
  - 16) The socket-outlet shall be installed near the equipment and shall be easily accessible.
  - 17) CAUTION  
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.  
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.
- # Operation Max temperature : 40°C
- # USB Load condition: USB Ports( 5 Vdc, Max. 500 mA)

## Specifications & Organization

### 1. Specifications

<b>Video standard</b>	PAL/NTSC
<b>Audio</b>	2-way Audio conference
<b>Monitor display</b>	Real time:25 Fps (PAL), 30Fps(NTSC) per camera
<b>Covert camera operation</b>	Programmable
<b>Event/Log search</b>	No limitation for user login/out, config changes, remote access, connects/disconnects
<b>Record Scheduling</b>	Daily, Weekly adjust specific Hr per channel
<b>Remote Access</b>	TCP/IP, View, Search, Recording & Control by Client Program or I.E.
<b>Playback</b>	Up to 4 Channel simultaneous playback
<b>Pre/Post alarm recording</b>	5 seconds(Pre), 3 minutes(Post), programmable per camera
<b>Activity detection</b>	12X12, Sensitivity levels: 10
<b>Video inputs</b>	4CH BNC
<b>Monitor outputs</b>	1 VGA(1024X768), 1 Composite(BNC)
<b>Audio inputs</b>	1 line-in, RCA socket
<b>Audio output</b>	1 x line-out, RCA socket
<b>Resolution</b>	352x240,704x240,704x480(NTSC), 352x288,704x288,704x576(PAL)
<b>Compression standard</b>	H.264
<b>Recording speed</b>	352x240 : 120/100 (NTSC/PAL) , 704x240 : 60/50 (NTSC/PAL) 704x480 : 30/25 (NTSC/PAL)
<b>Image size</b>	3-5 Kbyte (352x240, 352x288), 5-10 Kbyte (704x240, 704x288) 6-16 Kbyte (704x480, 704x576)
<b>Hard disk capacity</b>	1 X HDD, No limit in capacity
<b>Secondary Storage</b>	USB default (USB memory stick, USB HDD)
<b>Alarm inputs</b>	4 x TTL, programmable as NC/NO
<b>Alarm outputs</b>	1 relay out
<b>Back-up file formats</b>	AVI
<b>Network Speed Control</b>	8 levels
<b>OSD languages</b>	English, Spanish, Dutch, Portuguese, French, Russian, Japanese, Czech , German, Italian
<b>Ethernet interface</b>	10/100-Base-TX, RJ-45
<b>Remote Function</b>	Live View, Live Recording, Search, Set-up, Archiving
<b>PTZ Control</b>	RS-485 interface
<b>Supply voltage</b>	12VDC, 5A

## 3. System Organization

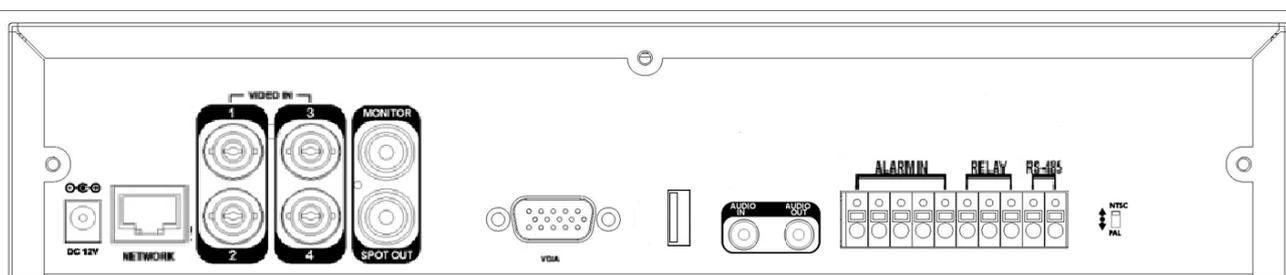

# Product Description

## 1. Front Panel

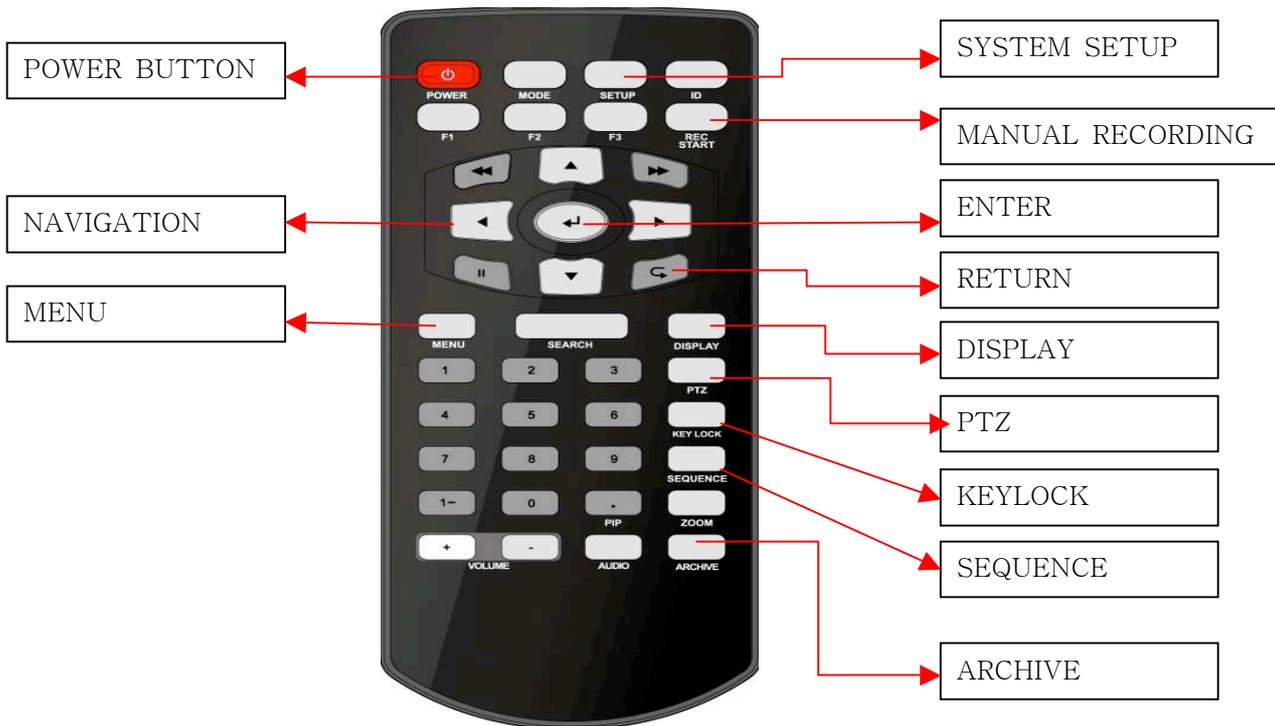

- **USB PORT:** Port for USB devices, for mouse and backup.
- **POWER:** Turn on power of system.
- **DISPLAY:** Select display mode between split and full mode.
- **SEARCH:** Enter to search menu
- **MENU:** Enter to system configuration menu.
- **NAVIGATION KEY:** use for navigating on menu or control PTZ.

## 2. Rear Panel

- **NTSC/PAL Switch**
- **Video Input:** Connect to coaxial cables from the video sources to the BNC video in Connectors
- **Monitor Out:** Connect AV monitor for main system OSD
- **Audio Input/Output:** Connect Mic to Input / Connect Speaker to Output
- **VGA Output:** Provide for RGB monitor output
- **Alarm in:** Connect Sensor devices
- **Relay:** Connect Relay device for
- **RS-485:** Connect PTZ camera or Keyboard controller.
- **USB PORT:** Port for USB devices, for mouse and backup.
- **Network:** Connect RJ-45 for local network or Internet
- **DC12V:** Connect the Power Source from Power Adapter.

## SYSTEM CONFIGURE – Remote Controller

## CONNECT & POWER ON

- Connect up to 4 **CAMERA INPUTS** as necessary.
- Connect one or more monitors to the DVR using the **COMPOSITE, VGA** connections
- Connect power to the DVR. The DVR checks for proper power connection and emits one beep. Press the **POWER BUTTON** on the front panel of the DVR to begin operation.

After startup diagnostics are complete, the operator must logon to the system. The default user name is 'ADMIN'. the default password of '1234' and press the **ENTER** button.

Double click on the Password tap then the Virtual Keyboard will be appeared. Then, click the password and click the OK button.

The DVR begins normal operation and shows the default display of all 4 channels.

The status bar at the bottom of the screen shows current time and date and percentage of hard drive used.

A title for each channel is shown.

The red square and letter 'C' in the top right of each channel display shows that the channel is recording in Timer / Schedule mode.

## LIVE DISPLAY

### DIVISION SCREEN

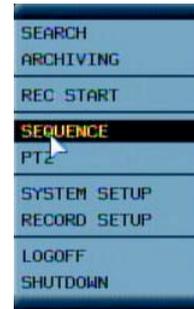

2 different display modes are supported by the 4 channel DVR. By repeatedly pressing the **DISPLAY** button, the operator can choose between single screen, 4 screen and basic sequence modes.

Press the Enter button. Then red square on camera title will be shown.

If pressing the Enter button again by moving the navigation key, user can select the single display channel.

Click the right mouse button on the Live Display screen and click the **SEQUENCE** menu.

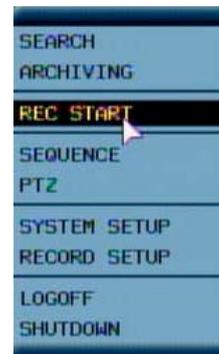

All the display modes are static with the exception of the sequence mode. In this mode, the sequence symbol (  ) is displayed and each channel is shown in full screen for a set period of time before switching to the next channel.

The sequence runs indefinitely until a different display mode is chosen.

### Manual Recording(Panic Recording, REC START)

Click the right mouse button on the Live Display screen and click the **REC START** menu

Manual recording will override all standard recording settings to provide, by default, continuous recording on all channels.

If selecting the REC START, The top right of the display shows a red square and letter 'P' only to indicate that the DVR is

in manual recording mode.

Select the REC STOP again to return to normal recording mode.

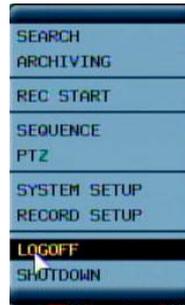

## Key Lock Function

An operator with ADMIN rights can choose to lock the DVR with mouse menu. Select the **KEYLOCK** button and YES.

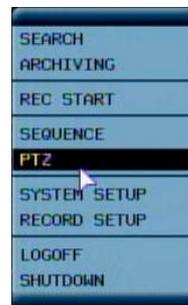

Click the right mouse button on the Live Display screen and click the **LOGOFF** menu.

## PTZ Camera Control

Click the right mouse button on the Live Display screen and click the **PTZ** menu.

Speed domes and other telemetry devices connected to the DVR, can be fully controlled from the front panel. In live display mode, press the **PTZ** button. To select a camera to control, use the **CHANNEL SELECTION** buttons.

Pan,Tilt and Zoom movement is controlled by the **CURSOR KEYS**

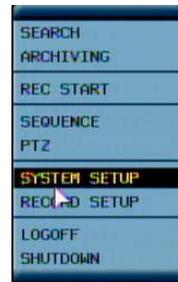

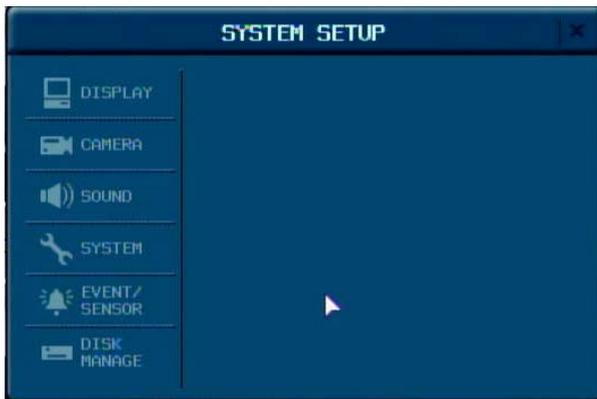

Click the PRESET & SWING menu.

All menus can be controlled by navigation key and pressing the mouse click.

## SYSTEM SETUP

Click the right mouse button on the Live Display screen and click the **SETUP** menu.

## DISPLAY

: To setup the various display options, highlight DISPLAY and press **ENTER**.

## DISPLAY - OSD

Click the **OSD** menu and click the ON/OFF menu. Then, click the  button for ON/OFF.

**STATUS BAR** : Turns the status bar at the bottom of the live display ON or OFF.

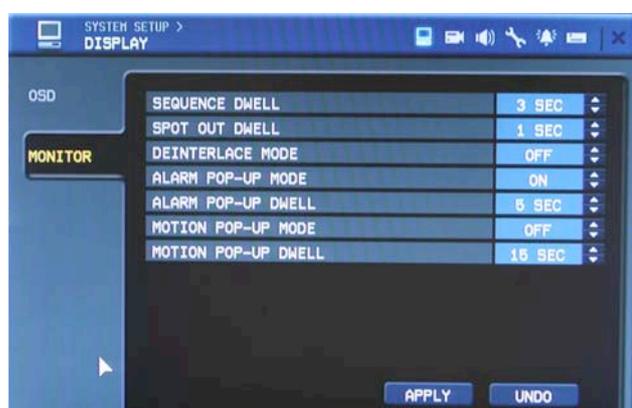

**CAMERA TITLE** : Determines whether the camera title is displayed.

**EVENT ICON** : Determines whether the DVR recording status is shown at the top right of each channel display window.

**BORDER** : Determines whether there is a border around each channel in multi screen display mode.

**LANGUAGE**: To change the Language, after selecting the language, please press the APPLY button, Then system will reboot and language will be changed.

## DISPLAY - MONITOR

Click the **MONITOR** menu and click the ON/OFF menu. Then, click the  button for ON/OFF.

**SEQUENCE DWELL** : The time that each screen is displayed in a sequence operation.

**SPOT OUT DWELL** : The time that each screen is displayed in a spot operation.

**DE-INTERLACE MODE** : When recording any channels in D1 resolution (704 x 480 / 704 x 576) this should be set to

ON to prevent judder during playback.

**ALARM POP-UP MODE** : When set to ON, an alarm input will cause the associated channel to display full screen.

**ALARM POP-UP DWELL** : Determines how long the full screen popup is displayed after an alarm input. If the alarm condition continues, the popup screen is displayed constantly.

**MOTION POP-UP MODE** : When set to ON, motion detection will cause the associated channel to display full screen.

**MOTION POP-UP DWELL** : Determines how long the full screen popup is displayed after motion detection. If motion continues, the popup screen is displayed constantly.

To change any of these settings, highlight MONITOR and press **ENTER** to select.

Use the **CURSOR KEYS** to navigate to the option required. Press **ENTER** to select the option (the cursor changes to orange) and use the **CURSOR KEYS** to change the setting. Press **ENTER** to save the setting or **RETURN** to cancel.

## CAMERA

To setup the various camera options, highlight CAMERA and press **ENTER**.

### CAMERA : CAMERA TITLE

Click the **CAMERA TITLE** menu and click ON/OFF menu on the COVERT menu.

Then, click the  button for ON/OFF.

Click the CAM No on the TITLE menu and change the camera name.

**COVERT:** When it is set to ON, the camera image is not displayed in live display but continues to be recorded.

**TITLE:** For each camera, a title of up to 11 characters can be set using the virtual keyboard.

### DISPLAY : COLOR SETUP

Click the **COLOR SETUP** menu and click the value on BRIGHTNESS, CONTRAST, TINT and COLOR menu.

Brightness, contrast, tint and color can be adjusted for each individual channel.

Highlight which channel to modify and press **ENTER**.

Click the each value by  button.

The selected channel is displayed in full screen.

BRIGHTNESS, CONTRAST, TINT and COLOUR can be changed as necessary.

To modify a different channel, highlight CAMERA and choose the desired channel.

Press **RETURN** when all changes are completed.

## DISPLAY : PTZ SETUP

Click the **PTZ SETUP** menu and click the each value

the ADDRESS, PROTOCOL and BAUD RATE menu.

Change the value by  button.

**ADDRESS:** The unique ID of the PTZ device.

**PROTOCOL:** The protocol of the PTZ device.

**BAUD RATE:** The baud rate of the PTZ device.

Click the  button and change the detail

value by  button.

PTZ properties can also be adjusted for each channel by selecting the  icon and pressing ENTER.

Note that some settings, such as AUTO FOCUS, may not be compatible with particular PTZ equipment. If this is the case, changing this value will have no effect on PTZ control.

### DISPLAY : MOTION SENSOR

Click the **MOTION SENSOR** menu and decide the value

the SENSITIVITY menu.

Change the value by  button.

**SENSITIVITY** : Between 1 (Lowest) and 10 (Highest) and determines the degree of motion required before recording is activated.

Click the  button.

**AREA SETUP** : Choosing this option allows the operator to define which areas of the image are monitored for motion detection.

Blue grid squares represent detection areas.

The area on the picture shows that motion will be detected across the entire image.

To quickly select or deselect the entire grid, click the right mouse button and click **SELECT ALL** or **DESELECT ALL** menu.

Or press **RETURN** to bring up the motion menu to select or deselect the entire grid,.  
Choose **SELECT ALL** or **DESELECT ALL** as appropriate.

Drag the grid by the left mouse.

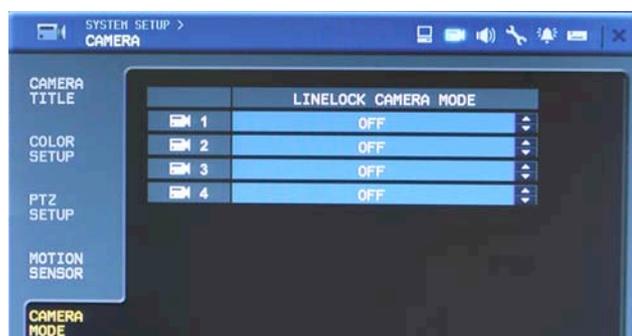

To select or deselect specific areas, press **ENTER** to bring up the yellow cursor square in the top left of the display.

Move the cursor using the **CURSOR KEYS** to the first corner of the area to be set and press **ENTER**

#### Please note

: a motion detection recording schedule must be defined in the **RECORD MENU** described.

#### DISPLAY : CAMERA MODE

To use **LINELOCK CAMERA**, set to **ON** a **LINELOCK CAMERA MODE**.

## SOUND

To setup the various sound options, highlight **SOUND** and press **ENTER**.

### SOUND : AUDIO

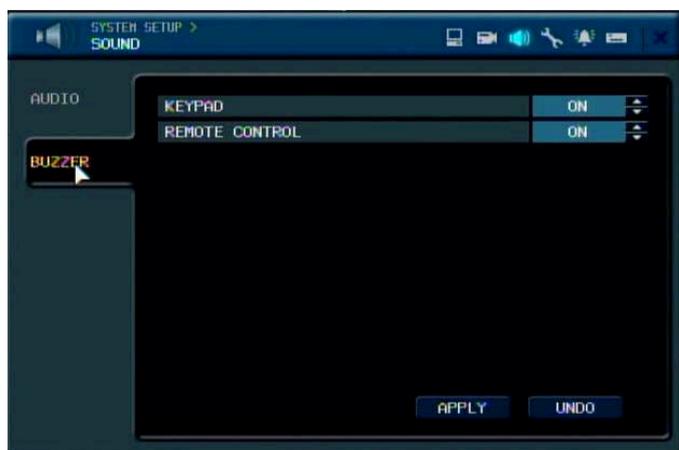

Click the **AUDIO** menu and click the ON/OFF menu.  
Then, click the  button for ON/OFF.

**LIVE AUDIO** : When it is set to ON, the selected audio channel can be monitored on the AUDIO OUTPUT.

**NETWORK AUDIO TX** : When it is set to ON, live and playback audio is transmitted to a remote PC connection.

**NETWORK AUDIO RX** : When set it is to ON, allows a remote PC connection to send audio back to the DVR.

### SOUND : BUZZER

Click the **BUZZER** menu and click ON/OFF menu.  
Then, click the  button for ON/OFF.

**KEYPAD**: When it is set to ON, each front panel button pressed, is confirmed by a beep.

**REMOTE CONTROL:** When set to ON, each command received from the IR remote, is confirmed by a beep.

## SYSTEM

To setup the various system options, highlight SYSTEM and press **ENTER**.

### DATE / TIME

Click the **DATE / TIME** menu and click the ON/OFF menu. Then, click the  button for ON/OFF.

**DATE TIME** : Allows the operator to set or modify the current date & time.

**DATE FORMAT** : Determines how the date is displayed.

**TIME FORMAT** : Determines how the time is displayed.

### **NETWORK TIME SERVER SETUP**

: If the DVR is connected to the Internet, the time and date can be accurately set by selecting SYNC and pressing **ENTER**.

**TIME ZONE SETUP** : should be set according to the region that the DVR is used in.

**D.S.T.** : When set to ON, the DVR will automatically adjust the time by one hour on the relevant date in spring and autumn.

## SYSTEM : NETWORK

Press the **NETWORK** menu and click the ON/OFF menu.  
Then, click the  button for ON/OFF.

**DHCP** : When enabled, the DVR will obtain an IP address automatically if connected to a DHCP server or router.

**DDNS** : When enabled, the DVR can be accessed through a Dynamic DNS server.

Commonly used if a broadband connection does not have a static IP address.

**IP ADDRESS** : If DHCP is not being used, the IP address can be manually set.

**GATEWAY** : If DHCP is not being used, the gateway IP address can be manually set.

**SUBNET MASK**: If DHCP is not being used, the subnet mask can be manually set.

**1ST DNS SERVER** : If DHCP is not being used, the first DNS server can be manually set.

**2ND DNS SERVER** : If DHCP is not being used, the second DNS server can be manually set.

**DDNS SERVER** : If DDNS is enabled, the host DDNS server is specified here.

**RTSP SERVER PORT** : The port number that the DVR uses to support remote connection from the client software.

**WEB SERVER PORT** : The port number that the DVR uses to support remote connection from Internet Explorer or other web browsers.

**ALIAS** : Display full domain name for accessing DVR.

This will be activated when press AUTO button beside of WEB SERVER PORT.

**MAX TX SPEED** : Specifies the maximum bandwidth that the DVR can use during a remote connection.

**Please note:** If any network settings are modified, the DVR will need to be restarted for changes to take effect

## SYSTEM : MAIL

Press the **MAIL** menu and click ON/OFF menu.  
Then, click the  button for ON/OFF.

**SERVER** : The SMTP outbound email server that should be used to send email notifications.

**PORT** : The outbound email port number.

**SECURITY** : Set to OFF if the SERVER does not require a username and password to connect.

**USER** : Enter a username to identify the DVR in email messages.

**PASSWORD** : If SECURITY is set to ON, enter the password here.

**TEST E-MAIL** : Can test the E-mail function.

**Please note** : A USER must be entered for the mail function to operate correctly. The username must not contain spaces

## SYSTEM : USER MANAGEMENT

Press the **USER MANAGEMENT** menu.

By default, the DVR is configured with a user ID of ADMIN, belonging to the ADMIN group and with a password of 1234.

As well as the ability to add new users, existing user details can be modified.

To modify user details, highlight the user with the blue box and double click.

Double click the **ADD** button.

To add the new user, press the **ADD** button.

**USER ID:** Edit the user ID using the virtual keyboard.

**PASSWORD:** Change the password using the virtual keyboard.

**GROUP:** Users can belong to one of two groups - MANAGER or USER.

(The user nr of ADMIN group is only one.)

**E-MAIL:** Enter the user's email address if email notification is required.

**E-MAIL NOTIFICATION:** Enable or disable email notifications for this particular user.

**Please note:** For security reasons, it is recommended that the ADMIN user password is changed after receiving the DVR.

Double click the current user.

By virtual keyboard, detailed information can be changed.

## SYSTEM: SYSTEM MANAGEMENT

Click the **SYSTEM MANAGEMENT** menu.

## SYSTEM INFORMATION

- **IP ADDRESS:** Shows either the manual IP address entered in NETWORK setup or the IP address assigned by a DHCP server if enabled.
- **MAC ADDRESS:** Shows the MAC (Media Access Control) address of the DVR. It is unique – no other network device has this MAC address.
- **DISK CAPACITY:** The first value shows the amount of hard drive capacity used by recorded footage, the second value shows the total hard drive capacity installed.
- **F/W version:** Shows the firmware version of the DVR.
- **H/W version:** Shows the hardware version of the DVR.
- **VIDEO SIGNAL TYPE:** The DVR automatically switches between PAL and NTSC depending on the

channel 1 input signal at power on.

- **DDNS SERVER** : If DDNS is enabled, the host DDNS server is specified here.
- **RTSP SERVER PORT** : The port number that the DVR uses to support remote connection from the client software.
- **WEB SERVER PORT** : The port number that the DVR uses to support remote connection from Internet Explorer or other web browsers.

**SYSTEM NAME** : A system name of up to 15 characters can be defined. It is used so that notification emails can be identified.

**F/W UPDATE** : Firmware updates may be released periodically to enhance system performance and add extra features. The operator can upgrade the firmware using a USB memory stick. After finishing the upgrade, system will be rebooted.

1) Select the “Press” icon from F/W upgrade and appear the login pop-up window.

2) After checking the USB detection from device item, press the “GET F/W” icon.

3) Select the F/W and Press the “Yes” icon.

4) After finishing, system is rebooted.

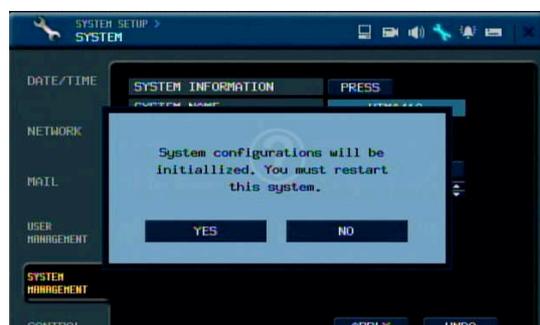

5) After rebooting one time, system will ask to reboot again with below pop-up window.

Press "OK" and system reboot again. After finishing reboot, F/W upgrade is finished successfully.

**FACTORY DEFAULT:** If settings have been changed which cause erratic behavior, the factory default settings can be loaded.

After finishing the factory default, system will be rebooted.

**Caution:** If you try to factory default, system will ask to format after finishing the factory default.

**SYSTEM DATA :** System settings can be saved to a USB memory stick. The settings can be reloaded in case of accidental factory reset or can be transferred to another DVR if multiple units need to be installed with the same settings.

After loading the configuration data, system will be rebooted

**SYSTEM : CONTROL DEVICE**

Click the **CONTROL DEVICE** menu and select the SYSTEM ID, PTZ Protocol and camera BAUD RATE.

This will allow up to 254 DVRs to be controlled from the same keyboard.

**SYSTEM ID:** If more than one DVR is connected on the same RS485 bus, each one must have a unique ID.

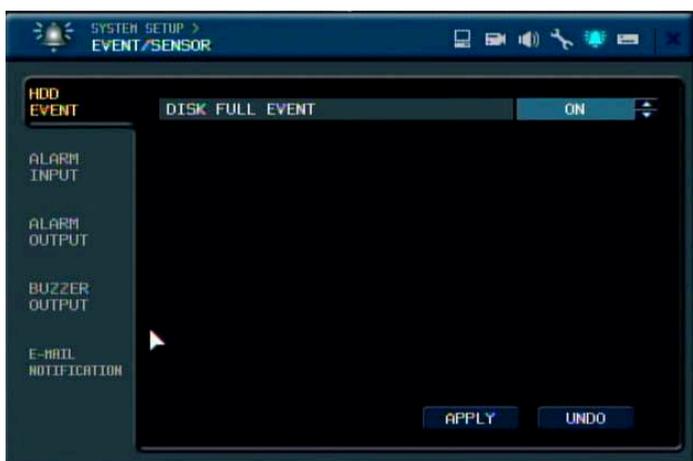

**PROTOCOL:** Must be set by Control Device.

**BAUD RATE:** Must be set to match the baud rate of the PTZ controller.

## EVENT / SENSOR

To setup the various event handling options, highlight EVENT/SENSOR and press **ENTER**

### EVENT / SENSOR: HDD EVENT

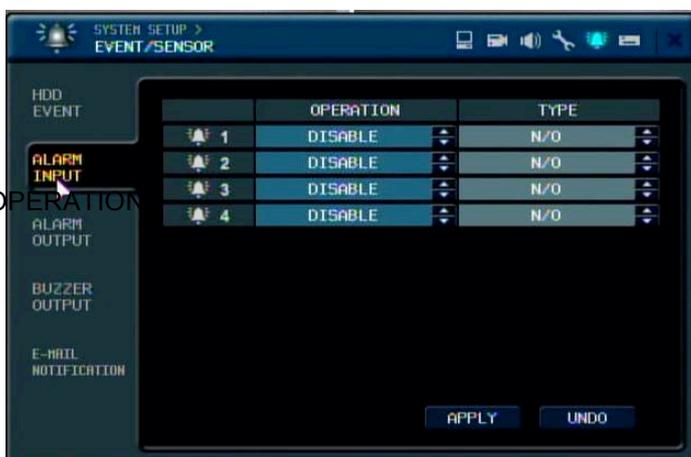

Click the **HDD EVENT** menu.

Then, click the value by  button to change.

DISK FULL EVENT: If it sets to “ON” alarm output and buzzer are activated when HDD becomes full.

### EVENT / SENSOR : ALARM INPUT

Click the **ALARM INPUT** menu and click the

and TYPE value.

Then click the value by  button to change.

Determine the behavior of each of the 4 alarm inputs.

**OPERATION:** Alarm inputs can be enabled or disabled.

**TYPE:** Alarm inputs can be set as normally open (N/O) or normally closed (N/C).

### EVENT / SENSOR: ALARM OUTPUT

Click the **ALARM OUTPUT** menu and click each value. Then, click the value by button to change.

Determine the behavior and actions that will trigger each of the 4 alarm outputs.

#### **Behavior settings**

**OPERATION** : The selected alarm output can be enabled or disabled.

**HDD EVENT** : Determines whether a hard drive event triggers the alarm output.

**MODE** : Can be either TRANSPARENT (the output is active only when the trigger criteria is present) or LATCHED (the output is active for a set period of time after a trigger).

**DURATION** : In LATCHED mode, the time that the alarm output remains active after it has been triggered.

#### **Action settings**

**ALARM** : Determines whether alarm inputs would trigger the alarm output.

**VIDEO LOSS** : Determines whether video loss on any of the selected channels will trigger the alarm output.

**MOTION** : Determines whether motion detection on any of the selected channels will trigger the alarm output.

**Remember to select "APPLY" and press ENTER to save all settings before exiting these menus**

### EVENT / SENSOR : BUZZER OUT

Click the **BUZZER OUTPUT** menu and click each value.

Then, click the value by  button to change.

Determine the behavior and actions that will trigger the internal buzzer.

**Behavior settings**

**OPERATION** : The internal buzzer can be enabled or disabled.

**HDD EVENT** : Determines whether a hard drive event sounds the buzzer.

**MODE** : Can be either TRANSPARENT (the buzzer sounds only when the trigger criteria is present) or LATCHED (the buzzer sounds for a set period of time after the trigger).

**DURATION** : In LATCHED mode, the time that the buzzer sounds after it has been triggered.

**Action settings**

**ALARM** : Determines whether alarm inputs will sound the buzzer.

**VIDEO LOSS** : Determines whether video loss on any of the selected channels will sound the buzzer.

**MOTION** : Determines whether motion detection on any of the selected channels will sound the buzzer.

Remember to select “APPLY” and press ENTER to save all settings before exiting these menus

**EVENT / SENSOR : EMAIL NOTIFICATION**

Click the **EMAIL NOTIFICATION** menu and click the each value.

Then, check the usage by clicking.

Determine the behavior and actions that will send an email to a remote user.

**Behavior settings**

**NOTIFICATION** : Email notification can be turned ON or OFF.

**HDD EVENT** : Determine whether a hard drive event sends an email.

**BOOTING EVENT**: Determines whether a reboot event sends an email.

### Action settings

**ALARM** : Determine whether alarm inputs will send an email.

**VIDEO LOSS**: Determine whether video loss on any of the selected channels will send an email.

**MOTION**: Determine whether motion detection on any of the selected channels will send an email.

**FREQUENCY**: E-mail sending period (10~30MIN)

Email settings must also be configured in **MAIL** and **USER MANAGEMENT** settings described **DISK MANAGE**

Click the **DISK MANAGEMENT** menu.

To manage the internal hard drives, highlight DISK MANAGE and press **ENTER**.

**RECORD TIME LIMIT**: In certain circumstances, it may be necessary to limit the amount of footage stored on the DVR (to comply with data protection laws for example).

Recording can be limited to 12 hours, 1,2,3days, 1week or 1,month.

Once the DVR has this amount of footage stored, it will start to overwrite the earliest recorded footage.

**DELETE DATA**: In case of selecting the recording time limit, user can select the current data is remained or removed.

#### **DELETE DATA : OFF**

Only ADMIN can review all recorded data even though RECORD TIME LIMIT is ON.

#### **DELETE DATA : ON**

ADMIN and Manager can review the recorded data within the duration of RECORD TIME LIMIT.

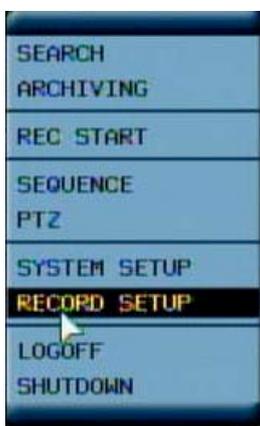

**OVERWRITE**: When set ON, the DVR will start overwriting the earliest recorded footage once the hard drive becomes full. In this case, the percentage of hard drive used shown in live display will always be 99%. When set to OFF, the DVR will stop recording when the disk becomes full.

**FORMAT**: If necessary, all footage can be erased from the DVR using this option.

**DISK INFORMATION:** Checking HDD Information.

**Please note:** When a **RECORD TIME LIMIT** is set, the **OVERWRITE** option cannot be changed

## **RECORD MENU**

Click the **RECORD SETUP** menu.

To setup the recording behavior of the DVR, highlight **RECORD MENU** and press **ENTER**.

## **RECORD : RECORDING OPERATIONS**

Click the **RECORDING OPERATION** menu and click the each value. Then click the value  button to change.

### **RECORDING MODE: SIMPLE/ADVANCED**

Default is simple mode. If changing the recording mode as ADVANCE, second item is changed from

SIMPLE RECORDING to ADVANCED RECORDING.

**SCHEDULE MODE** : Either DAILY (one schedule will apply to every day of the week) or WEEKLY (each day of the week has its own schedule).

**Please note:** When recording mode is simple mode, this option cannot be changed.

**PRE EVENT RECORDING TIME** : When the DVR is not in continuous recording mode, this setting determines the amount of footage that is always recorded before an event occurs. (motion detection, alarm input etc.)

**POST EVENT RECORDING TIME** : When the DVR is not in continuous recording mode, this setting determines the amount of footage that is always recorded after an event occurs. (motion detection, alarm input etc.)

## SIMPLE RECORDING

Click the **SIMPLE RECORDING** menu.

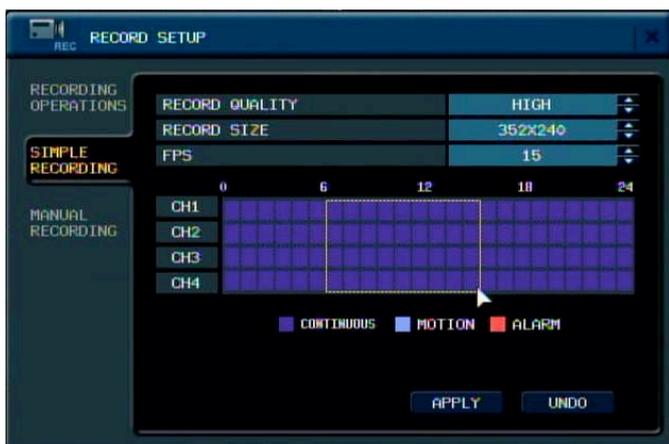

The simple recording controls the quality, size and FPS for all cameras at the same time. Each channel can be set for a single recording type(Continuous, Motion, Alarm)

**RECORD QUALITY:** Sets the video recording quality to Low, Standard, High or Highest for all cameras.

**RECORD SIZE:** Sets the video capture size for all camera to 352X240, 704X240, 704X480(NTSC) for all cameras.

**FPS:** Sets the Frames per second for recording across all channels. The FPS for the channels can be set to 1,2,3,7,15 or

30FPS for NTSC, and 1,2,3,7,13 or 25FPS for PAL.

Click a single block to open the recording type menu. Click and Drag a block of times to configure multiple channels and times at once.

## ADVANCED RECORDING

Click the **ADVANCED RECORDING** menu.

This setup screen allows the operator to configure the recording mode of continuous, motion and alarm recording.

There are 2 sections:

**SETTING:** Recording settings for each channel can be defined across a 24 hour period, in blocks (for example between 09:00 and 18:00) or for each individual hour. Note that when SCHEDULE MODE is set to WEEKLY, each day of the week can also be selected.

**ACTIVATION:** This section determines at what times the DVR will record and whether it is continuous recording, motion detection or alarm recording.

## SETTING

Click the **SETTING** menu.

Select the time block that want to set.

Click the SIZE, FPS, QUALITY, AUDIO and ALARM value. Then, click the value by  button to change.

Press **ENTER**. Recording settings for the selected time period are displayed.

**SIZE** : Recording resolutions of 352x240/352x288, 704x240/704x288 or 704x480/704x576 can be selected for each channel.

**FPS** : Frame rates between 1 – 30(NTSC) or 1-25(PAL) can be set for each channel.

**QUALITY** : Four different picture recording qualities can be set for each channel.

**AUDIO** : If audio devices are connected to the DVR, any audio channel can be assigned to any of the video channels.

**ALARM**: Select the Alarm channel that related with alarm recording.

During playback, when a particular channel is selected in full screen, the assigned audio channel will be played back at the same time.

Adjust values as desired and select OK to finish and return to the setting menu. Other time periods can be configured in the same manner.

Remember that if SCHEDULE MODE is set to WEEKLY, recording settings need to be changed by each day as well as each particular time

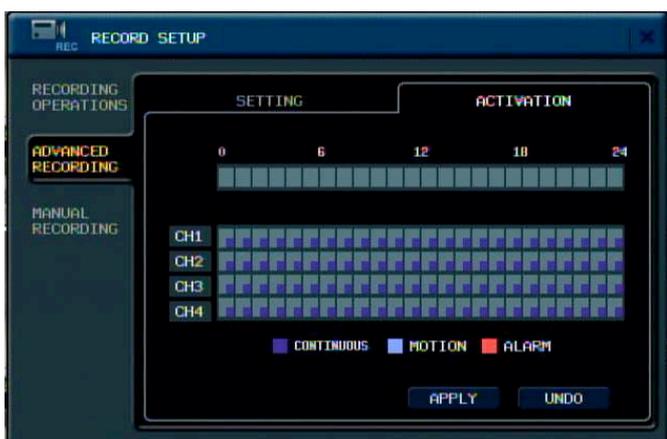

**Note:** The DVR supports a maximum recording rate across all channels of 120 frames per second at 352x240 resolutions.

As settings are adjusted, the 'frames available' at bottom left displays the number of available frames still remaining and must always be zero or higher.

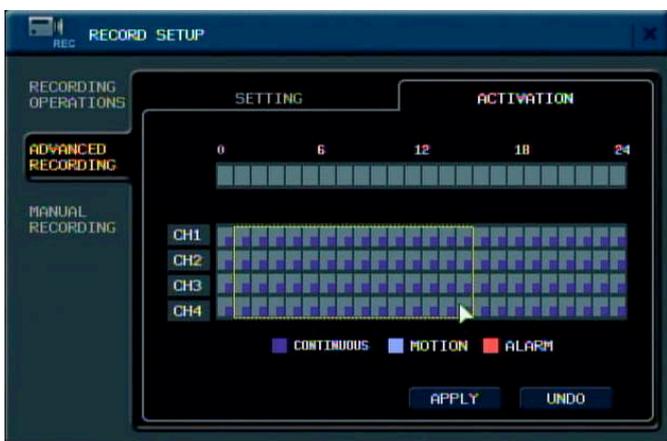

If, whilst changing recording settings, this figure becomes negative, recording resolutions and / or frame rates must be lowered to increase the 'frames available' value to zero or above.

## ACTIVATION

Click the **ACTIVATION** menu.

Select the Channel and time that want to set.

After selecting the channel and time, select the recording type.(Continuous, Motion and Alarm)

## MANUAL RECORDING(Panic Recording)

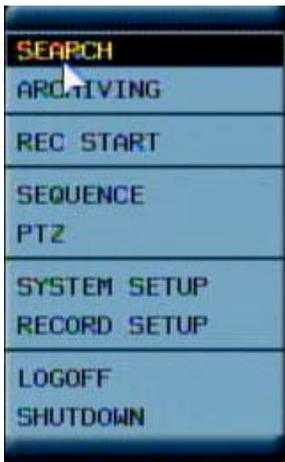

Click the **MANUAL RECORDING**.  
Select the Size, Frame, Quality and audio.

During manual recording mode, the DVR will override all other recording settings and record continuously on all channels at the settings configured here.

**Manual recording time:** After passing the assigned time, recording is returned as original recording type.

## SEARCH

Click the right mouse button on the Live Display screen and click the **SEARCH** menu.

To search for a particular section of recorded footage, press the **SEARCH** button.

To protect unauthorized viewing of footage, only ADMIN and MANAGER user levels can playback footage.

To login as ADMIN, enter the default password of 1234 and press **ENTER**.

## SEARCH : TIME SEARCH

Click the date that user want.

The DVR uses a calendar and timeline search method for quick access to recorded footage.

The calendar displayed on the left shows the current month.

Days highlighted in green have recorded footage.

The timeline on the right shows a 24 hour status of all channels for the selected day. Light blue areas show recorded footage.

Drag the time bar by left mouse.

Press **ENTER** to select the calendar and use the **CURSOR KEYS** to move the purple square to the required day.

As different days are selected, the timeline display also changes to show recorded footage on that day.

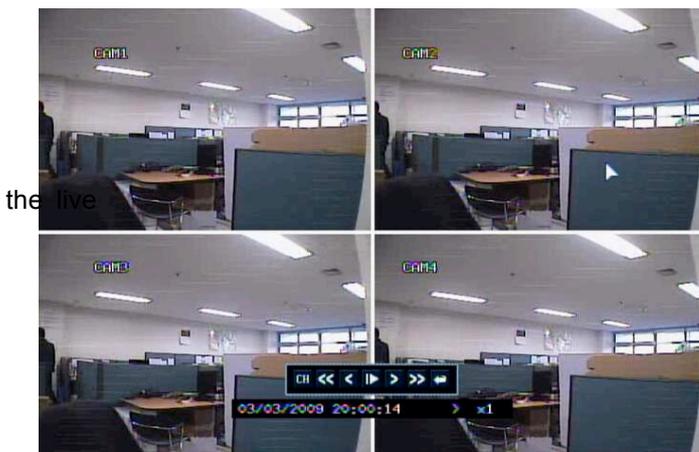

Press **ENTER** to choose the day and move to the timeline.

Use the **CURSOR KEYS** to move the timeline cursor left or right to select the time segment required.

Each movement of the timeline cursor increases or decreases the time by 15 minutes.

The currently selected time is displayed above the calendar.

Select the **PLAY** to begin playback from the selected time.

By pressing **DISPLAY** or using the **CHANNEL SELECTION** buttons, it is possible to display a single screen or 4 screens in a similar way to display mode.

Playback speed and direction can be controlled using the five playback buttons in menu. To exit the search screen and go back to live view, repeatedly press **RETURN**.

## SEARCH : EVENT SEARCH

The DVR event log stores events such as motion and alarm activated recording, video loss etc.

Click the **SEARCH BY EVENT** menu and each value. Then click the value by  button to change. Click the **START** menu.

To display the event log screen, select SEARCH BY EVENT.

Various filters can be used to limit the number of events displayed. Using the **CURSOR KEYS** and **ENTER** button, select the FROM and TO date / time and the events and channels required.

Click the **START** menu.

Highlight **START** and press **ENTER** to display the event log for the criteria selected.

To playback footage for a particular event, select the event from the list using the **CURSOR KEYS** and press **ENTER**.

Playback resumes from the moment the selected event occurred and continues until stopped by the operator.

During event search playback, playback buttons can be used as normal.

To stop playback and return to live view mode, repeatedly press **RETURN**.

**Note:** The event log search contains the following selectable entries:

**ALARM:** When ticked, all alarm input events are displayed for the chosen date range.

**TIMER:** When ticked, scheduled recording operations are displayed for the chosen date range.

**MOTION:** When ticked, all motion detection events are displayed for the chosen date range.

**ETC:** When ticked, all other events (Video loss, remote connection etc.) are displayed for the chosen date range.

## **ARCHIVING**

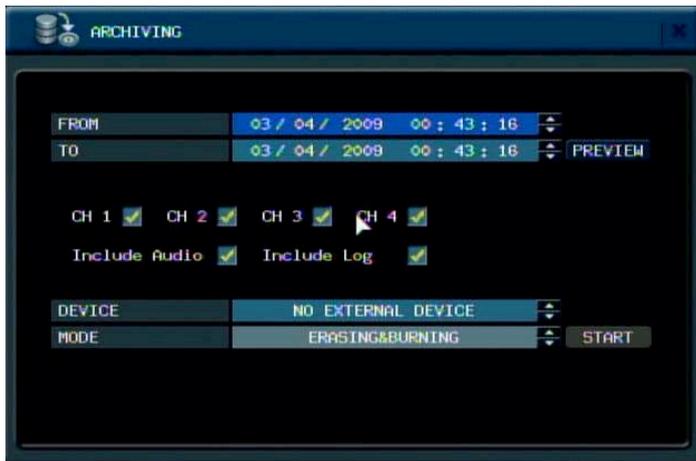

Click the right mouse button on the Live Display screen and Click the **ARCHIVING** menu.

To archive recorded footage to USB memory stick , select the ARCHIVING button.

To protect unauthorized viewing and distribution of footage, only the ADMIN user level can archive footage.

To login as ADMIN, enter the default password of 1234 and press **ENTER**.

Click the each value.

Then click the value button to change

Click the **START** menu.

The Archiving screen allows the operator to choose exactly what to backup and to where.

Use the **CURSOR KEYS** to navigate around the Archiving screen. To change any value or setting:

Press **ENTER** to change the green cursor to orange.

Use the up and down **CURSOR KEYS** to change the value.

Press **ENTER** to accept the value or RETURN to cancel.

To change a tick box setting, press ENTER to toggle on or off.

**FROM / TO:** Start and end time to backup.

**CHANNEL:** Video and audio for any channel

be included or excluded from the backup.

Check the “Include Audio” and “include the log”

**SELECT DEVICE:** Choose between USB device.

**MODE:** 'Bruning' or 'Erasing&Burning'

**Please note:** To use a USB memory stick, it must be inserted before selecting the archiving menu

Additionally make sure to do the "PREVIEW" firstly. If not doing the "PREVIEW", user can not start the backup.

Click the **OK** menu.

Once all the desired archive options have been selected, highlight the START button and press **ENTER**.

The DVR displays a list showing the exact information to be archived and the total archive size.

If the ORIGINAL SIZE is larger than the available space on the backup media, the END TIME of the archive set is reduced accordingly.

The MODIFIED SIZE is the final file size of the archive set.

Select "OK" and press **ENTER** to begin the archive process.

Once extracted, the footage is copied to DVD or USB.

Note that depending on the amount of footage selected for archive, the extracting and burning process may take some time, during which the DVR cannot be used.

Normal recording is unaffected by the archive process.

## **REMOTE CLIENT SETUP**

### **PRELIMINARY BEFORE CONNECT**

For using web connection, 554 and 8080 ports should be done port forwarding set in Router.

Refer the manual of Router for port forwarding setting

<b>WEB RA MINIMUM PC REQUIREMENT</b>	
CPU	P4 3.0 or Higher
RAM	512MB or Higher
VGA	Geforce MS 400, Radeon 7500 or higher
	Gefore 8 series or higher
VGA MEMORY	64MB
MONITOR	1280X1024
OS	WINDOW XP2
IE VERSION	IE6.0 or higher
NETWORK	100Mbps
DIRECT X	V7.0 or higher

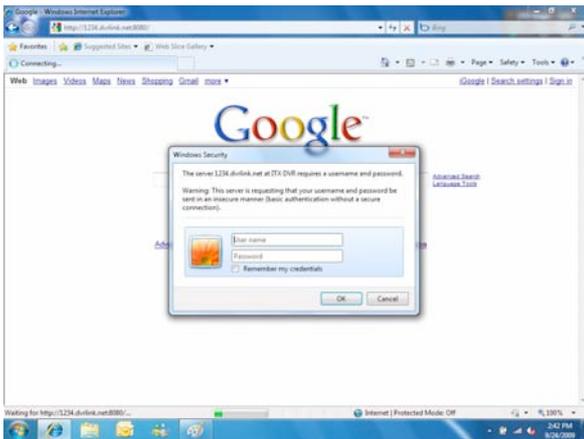

### **12.1 HOW TO CONNECT**

Input the IP Address or URL of the DVR in the Internet Explorer Address Bar.

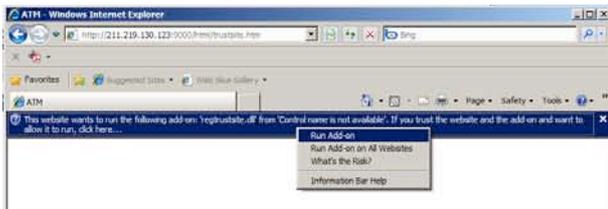

When user uses the DDNS service, input the URL as below.

**<http://1234.dvrlink.net:8080> (webport :8080) or**

**http://1234.dvrlink.net (webport :80)**

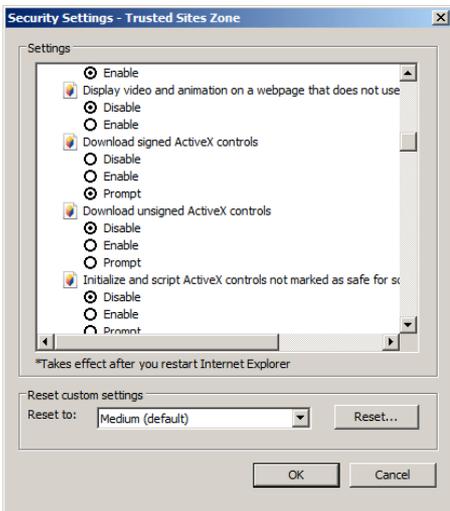

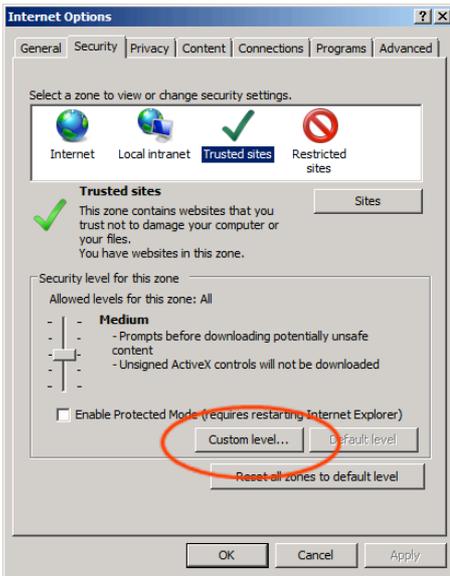

Default ID and password are 'ADMIN' & '1234'

User needs to install Active-X, click Run Add-on

In case of, unable to install active-X, User needs to check the option of activeX on IE security menu.

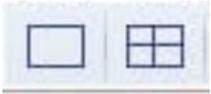

Select Enable for all ActiveX related options.  
(ex, Download signed ActiveX control, Download unsigned ActiveX control....)

## 12.2 LIVE MODE

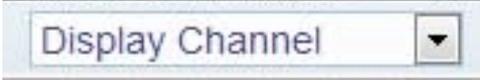

Explanation of function button in LIVE mode

Select live division screen.

Move to next screen and make full screen

Select live channel.

Activate Mic to send a sound to DVR.

On/Off Sound from DVR

Save the live image.

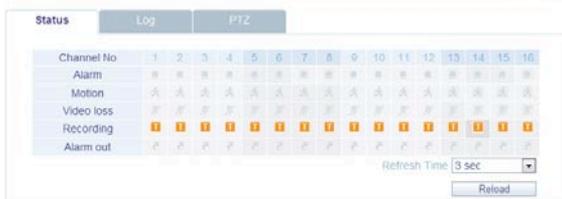

Print the current screen.

Snapshot the current screen.

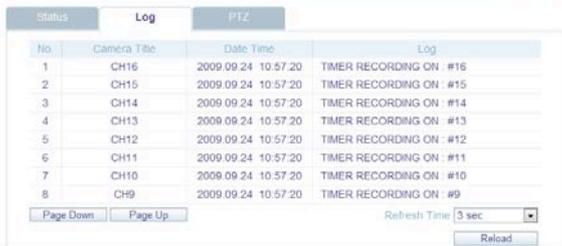

Setup [Render] and [Save Folder]

**Status** : Can see the current DVR status.

1. Alarm – Indicator will be marked when system detects Alarm input.
2. Motion- Indicator will be marked when system detects Motion
3. Video Loss - Indicator will be marked when system detects Alarm input.
4. Recording – Display current recording mode  
(T: Continuous, M: Motion, A: Alarm recoding)
5. Alarm Out - Indicator will be marked when system detect Alarm output.
6. Refresh Time – set interval of refresh or Reload for manual refresh.

**Log** : Can see the log.

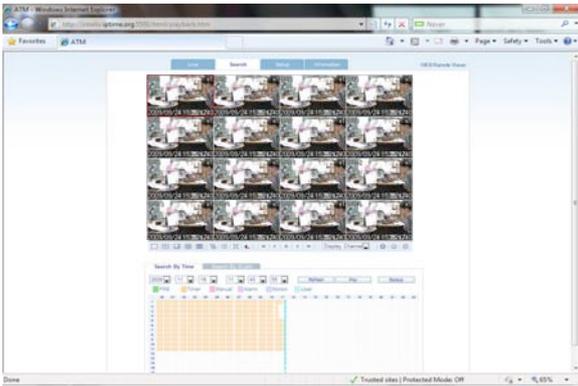

**PTZ** : Can control connected PTZ camera.

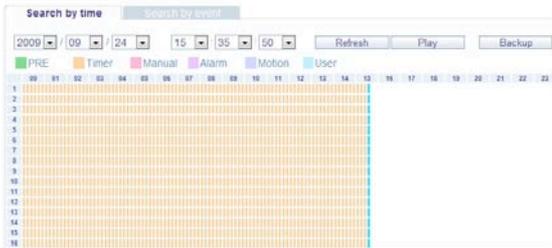

1. Pattern – move a camera among several preset position
2. Preset – set a position of camera view.
3. Swing – move a camera between two preset point.

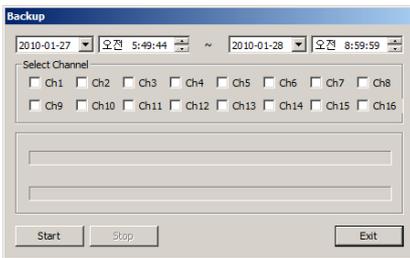

### 12.3 SEARCH (Common time line search)

1. Select a time line on time table or set a exact time.
2. Then press 'Play' button

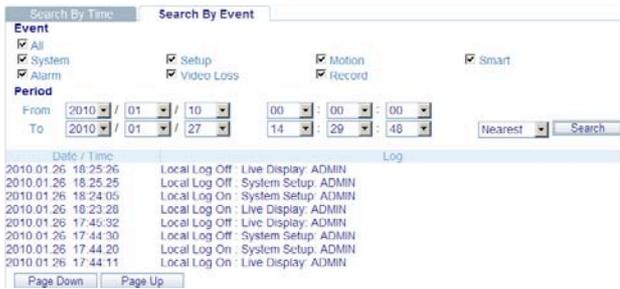

1. Refresh : Refresh the data.
2. Play : After select the date and time, can play the data.
3. Backup : Can backup special channel and time.

## 12.4 SEARCH BY EVENT

1. Event : Select necessary event to playback.
2. Period : Select the date an time of Start to End.
3. Search : Start the selected data.

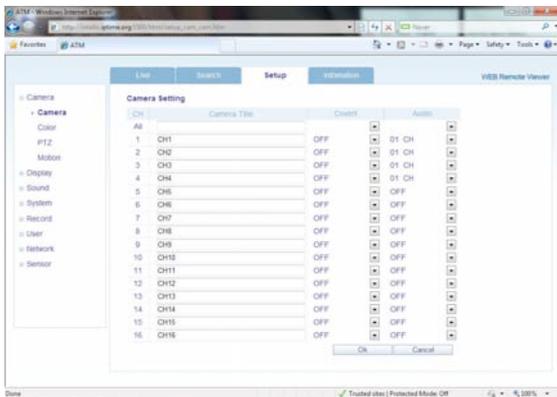

4. Select a event on the list then DVR starting to playback the related camera's image

## 12.5 SETUP MODE

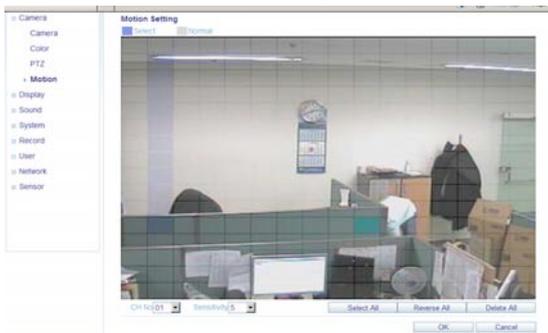

All settings are same as DVR setup.

### 1. CAMERMA

user can configure camera's attribute such as title, live color, PTZ setup or motion

Motion setup for detecting motion events.

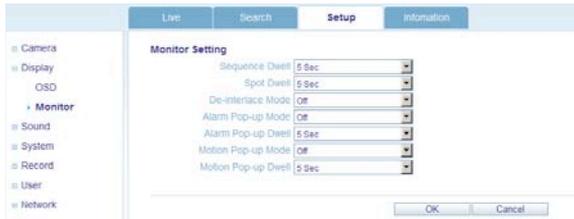

- 1) Select Motion menu tab.
- 2) Select a channel and sensitivity.
- 3) Drag a mouse on image for select detecting area.
- 4) Press OK.

## 2. Display

1) OSD – User allow to choose text display items over the image.

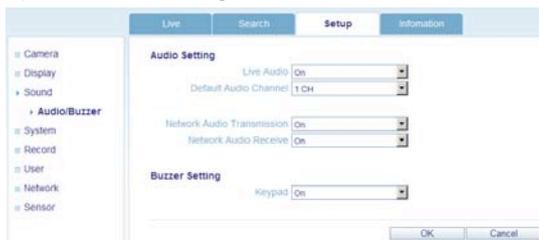

2) Monitor - user can set dwell time for sequence or spot, and pop up function.

## 3. Sound

1) Audio Setting – Select a live audio channel and activation

2) Buzzer setting – Activate buzzer out for event notification

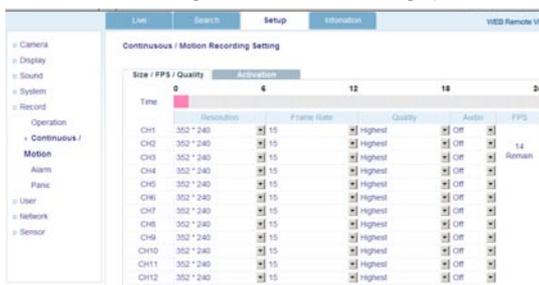

## 4. System

User can configurable DATE of system, check system information and set controller.

## 5. Recording

User can configure the recording parameter, Setting detail is same as system.

## 6. User

Allow to add user, select Authority level and Log out time

## 7. Network

User can check the system's network information and selectable speed level. But IP settings are not allowed to change on remote site.

Network IP only can set on system.

For email notification, user can input the SMTP server detail on below setup.

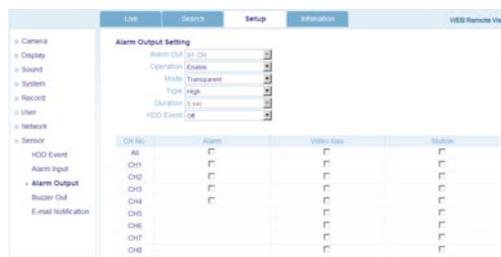

## 8. Sensor

Management can set all device option of Alarm in/out, buzzer out for event notification.

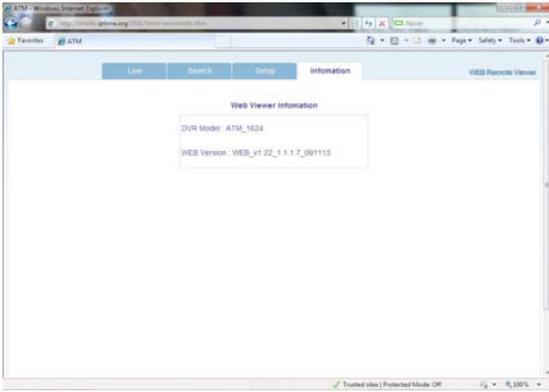

(HDD EVENT, Alarm Input, Alarm output, Buzzer Out, Email notification option)

All detail setup follow DVR system setup

## 12.6 INFORMATION

Check DVR model name and WEB version.

## 13 SMART PHONE CONNECTIONS

### ♣ I-PHONE

1. Select the Safari browser

2. Enter the IP address or URL to connect.  
And Click the [GO] button.

3. Enter the User name and Password then use can see the Image. (Default ADMIN / 1234)

Only allow to surveillance live view, not playback and other function.

## ♣ Blackberry

1. Select the Web browser.

3. Enter the IP address or URL to connect.
4. And press the Enter button.

3. Enter the User name and Password then use can see the Image. (Default ADMIN / 1234)

The DVR is supplied with software to allow remote connections either on a direct LAN connection or over the Internet.

The remote client allows full live viewing of the DVR including control of PTZ cameras.

In addition, playback, remote setup, audio talkback, local backup and remote alarm triggering can all be achieved.
